

Person: Ryan Abbott

Topic: Work

When I worked at IntelliBridge, I lived in Norman, Oklahoma, and I worked from home. My remote work at IntelliBridge continued through 2024, when I moved to Oklahoma City. I left IntelliBridge in April of 2025, and joined Liberty Energy. I worked in El Reno, Oklahoma, and I worked in-person. In April 2026, I started doing AI and machine learning consultation for a large global enterprise. I did my consulting remotely. In May of 2026, I started freelance web development for a local business, working from home.
